22 January 1982

MEMORANDUM FOR: Deputy Director for Administration  
FROM: John N. McMahon  
Executive Director  
SUBJECT: Emergency Paper Destruction Overseas

I have noted from a report which [ ] sent to the DDO, in 40 practice burnouts during the past year, the destruction equipment did not hold up and perform its function when used over a several hour period. That being a fact of life, at the moment the stations of course should maintain their holdings within the destruction limitations of the equipment they have. However, that situation is something that I'm not content to remain with and ask that you have Security look into the type of equipment we have and what we can do to improve its capabilities.
